**Subject:** Fact sheet stuff

Here is what I have for Allied:

The proposed remedy for Allied Landfill is Alternative 2D, consolidation of materials to a 27-acre area, installation of a cap and a long-term groundwater monitoring network. Areas outside of the cap would be available for commercial/industrial redevelopment and the capped area would be available for some recreational reuse. Alternative 2D meets the evaluation criteria, offers a high degree of long-term effectiveness and permanence and represents the best balance of long-term and short-term effectiveness, implementability, and cost. EPA expects to finalize this remedy by issuing the Record of Decision in the early fall. The next steps will be to engage potentially responsible parties on implementation of the remedy.

What did I have for the other landfills last time? If you send it to me, I'll tweak it.
